This "anti-Semitic" accusation from the ADL shouldn't even be dignified. You are being bullied by a corrupt organization.

In 1993, the ADL was indicted for spying on American citizens for Israel.

In 1994, the ADL was involved in illegally wiretapping an American family's phone

**Josh Hawley** ✓  
@HawleyMO

Anti-Semitic "dog whistle"? Delivered at a conference organized by an Israeli Jew, to an audience of many Jewish-Americans, and from a guy who has been an ardent advocate of the state of Israel and the Jewish people? Nice try.

This case was big news in Denver when it happened in 1994. A Jewish couple and a non-Jewish couple were neighbors and didn't get along. The Jewish couple, the Aronson's, thought that their neighbors, the Quigley's, were trying

PEOPLE OF THE STATE OF CALIFORNIA,  
Plaintiff,  
v.  
ANTI-DEFAMATION LEAGUE OF B'NAI  
B'RITH AND ROY E. BULLOCK,  
Defendants.

No. 956416  
COMPLAINT FOR INJUNCTION  
(Business and Professions  
Code Section 17200)

On information and belief, Plaintiff alleges that:

1. The alleged civil violation of law described herein has been carried out in full or in part within the City and County of San Francisco. The authority of the San Francisco District Attorney, Arlo Smith, to bring this action is derived from California Business and Professions Code Sections 17204 and 17206.

2. Anti-Defamation League of B'nai B'rith (hereafter "League") is a not-for-profit corporation, incorporated under

WLO SMITH  
District Attorney

to run them out or town because they were Jewish. I the Aronsons took their beef to the Anti-Defamation League:

At a 1994 news conference, the ADL accused the Quigleys of perpetrating the worst anti-Semitic incident in the area since the slaying of Jewish talk-show host Alan Berg 10 years earlier. They were accused of launching "Operation Aronson," an effort to run their Jewish neighbors, Mitchell and Candace Aronson, out of town. Criminal and civil complaints filed by the Aronsons against the Quigleys, however, were eventually dropped by prosecutors or dismissed, and the Quigleys countersued the ADL, which had championed the Aronsons.

The Quigleys claimed that the Aronsons, upon the advice of the ADL, began tape-recording the Quigleys' cordless telephone calls and making notes of other clashes....[they] said the ADL "orchestrated a monstrous invasion of their privacy and a destruction of their good name."

The ADL also uses their influence within the US government to bully other countries into capitulating with Jewish interests:

Replying to @cursedsalad

20. The ADL even got in on the action, sending a letter directly to Iceland's Minister of Foreign Affairs threatening to smear the country as a modern-day Nazi Germany should the bill proceed to a vote. The ADL even alludes to how it will use its control of the media to do it.

Submitted by Jonathan Greenblatt, CEO, Anti-Defamation League (New York, USA)  
March 19, 2018

The Anti-Defamation League (ADL) is one of America's premiere human relations and civil rights agencies and is dedicated to prevent and progress to combating anti-Semitism and all forms of bigotry, including discrimination against and promoting civil rights for all.

**We write to offer three compelling reasons against the adoption of a ban on hate discrimination.**

**Religious freedom**

The proposed to ban hate discrimination is antithetical to basic principles of religious freedom and deeply offensive to Jews and Muslims. The commitment of free speech, discrimination on the basis of race, is a fundamental religious right in Judaism and universally practiced by all families who identify as Jewish across the broad spectrum of practice. Such a law would mean that no Jewish family could be named in Iceland, and it is inconceivable that a Jewish community could exist in any country that prohibited free speech.

Israel's Supreme Court ruled in 2008 that civil and hate discrimination is protected under the European Convention on Human Rights by the right to personal autonomy, as part of the right to privacy (Article 8), the right to family life (Article 14), and the freedom of religion and conscience (Article 9), where "expressly prohibited."

**Medical health**

According to the American Academy of Pediatrics, "Evaluation of current evidence indicates that the health benefits of genetic testing are outweighed by the risks and that the procedure's benefits justify access to this procedure for patients who cannot identify themselves as affected individuals. Prevention of untimely test results, genetic testing, and management of test results are essential components, including HLA." (<https://www.aadp.org/advocacy/2018/03/19/>)

Admission beginning September 10, 1970 (New York standard design)

present among U.S. means age 14 to 19, the opinion of the American Academy of Pediatrics should be considered more authoritative than European study which asserts the contrary.

**Iceland's international standing and negative economic impact**

The Anti-Defamation League is the leading monitor of the rights of religious and minority groups in the United States. Should Iceland ban hate discrimination, including its responsibility for Jews and Muslims in your country, we guarantee that Iceland will be caricatured by neo-Nazi, white supremacist, and other extremists. Even though anti-Semitism was nearly non-existent in the past, the result of its adoption will be the glorification of hatred by the most despicable Nazis. They will celebrate the ban as the first legislation in Europe since World War II towards making Europe Judenrein, free of Jews.

**ADL has analyzed the parameters of anti-Semitism, content on social media, and we know that a relatively small number of extremists are able to amplify their message globally and locally through social media. ADL, regularly reports on such phenomena, and we will report on extremist groups for Iceland. We urge you to consider the significant media attention, in the U.S. and internationally, paid to ADL reports on extremism. In the past six months alone, our research and reports have been featured on CNN and other cable TV channels, NBC and other broadcast TV, on 60 Minutes, the most watched TV news magazine in America, and in leading newspapers, including The New York Times and The Washington Post.**

Given that 20% of Iceland's economy came from Jewish America in 2016, Iceland's standing in the U.S. should be of great concern from an economic perspective. We can envision that the vast majority of American tourists will avoid a country where legislation is associated with Nazis, even if that legislation is not justified.

Individuals, any of these three arguments should convince you to oppose a ban on hate discrimination. Collectively, they should compel you to make the right decision and oppose the proposed law.
